ДРУЖНЫЕ СОСЕДИ

Стихи и сказки в стихах

ДРУЖНЫЕ СОСЕДИ

Тараканы с пауками
По соседству жили.
Тараканы с пауками
Семьями дружили.

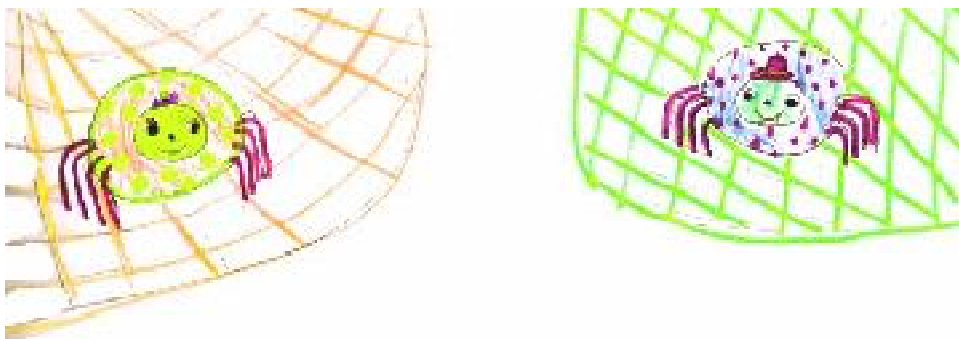

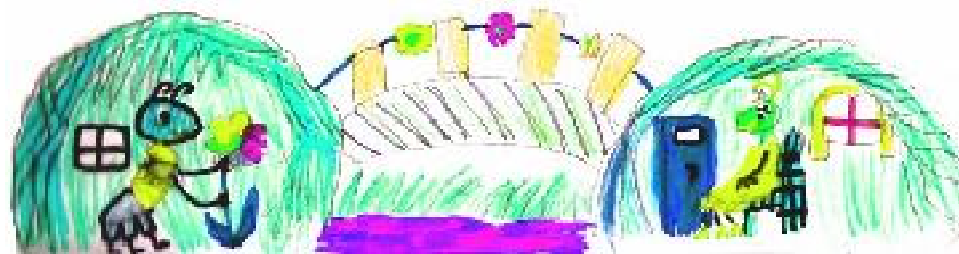

рис.Олеси

Тараканы паучихам
Говорили чётко, лихо:
"Вызывайте пауков,
Мух здесь много и жуков."

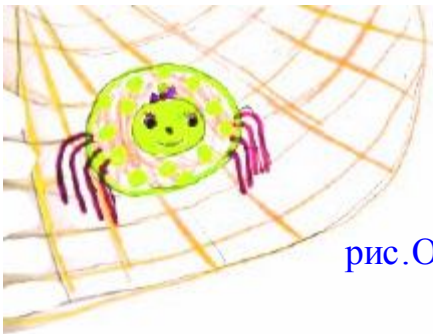

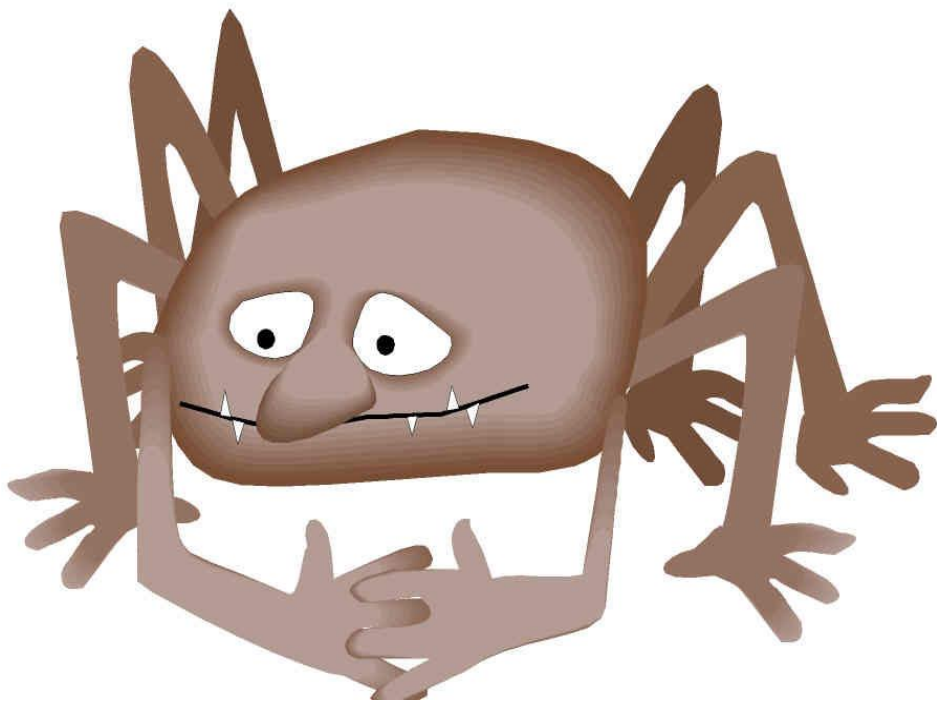

рис.Олеси

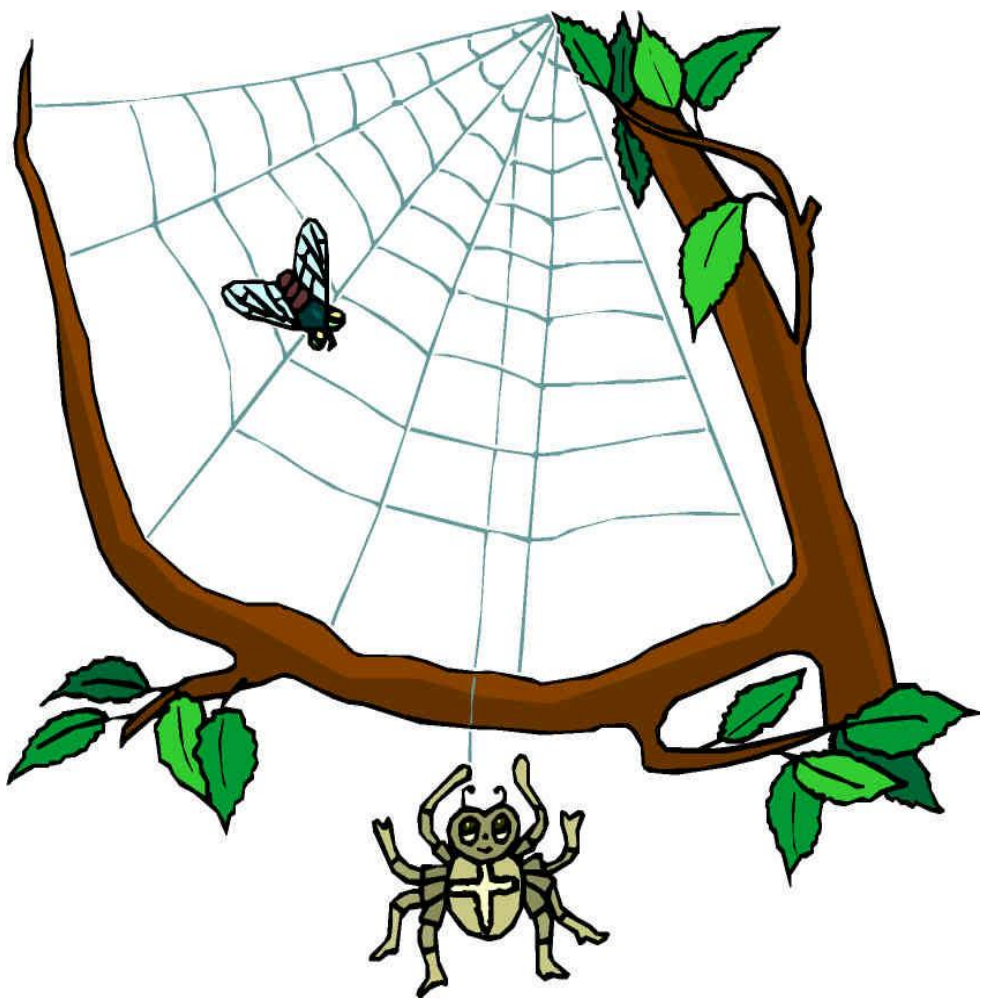

**Выползали пауки...
В паутине все жуки,
В паутине мухи,
Не жужжат от скуки.**

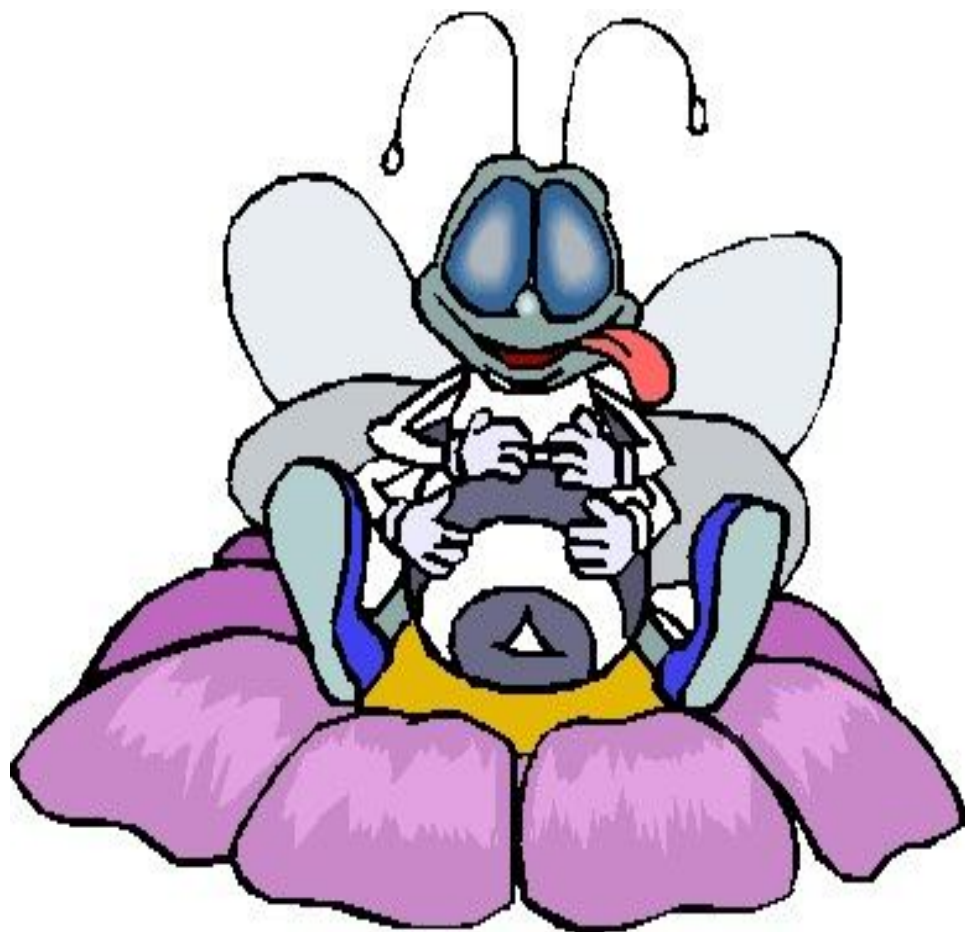

рис.Олеси

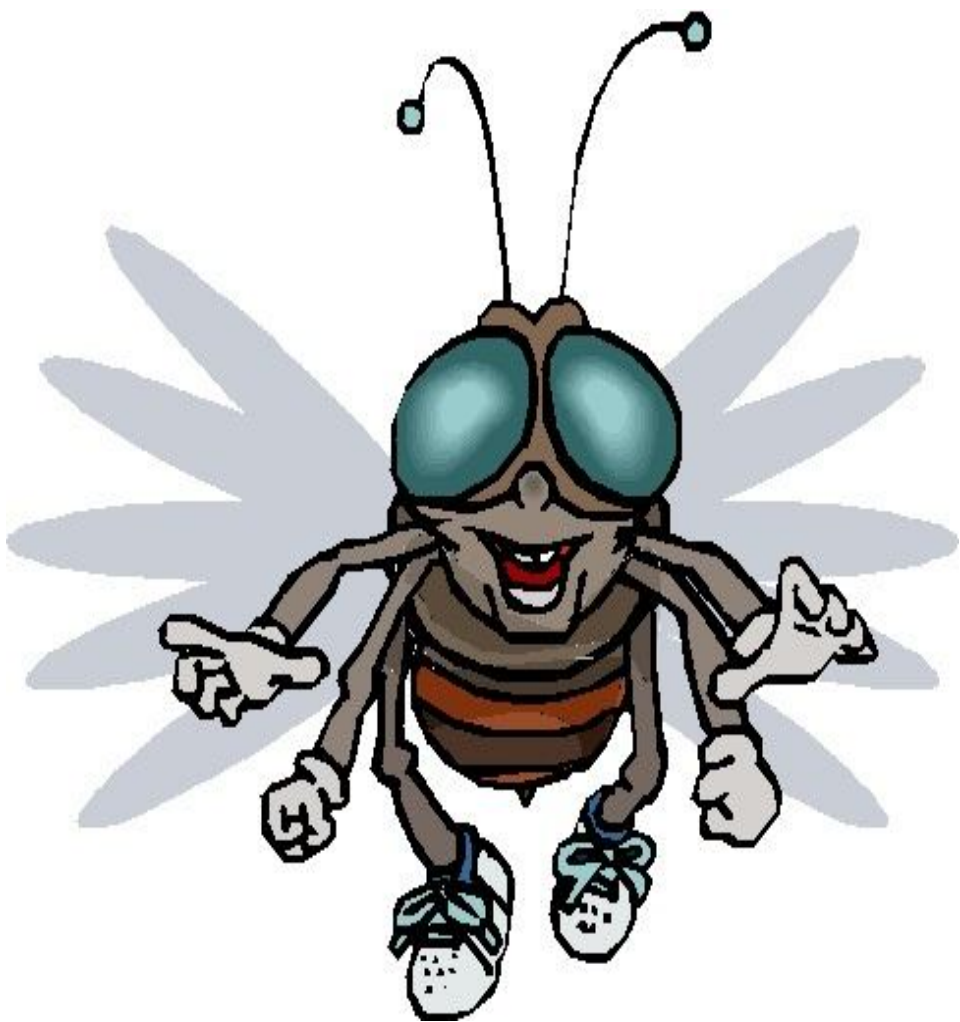

**Паучихи, паучихи -
Белошвейки и портнихи.
Мухам шьют наряды,
Мухи рады-рады.**

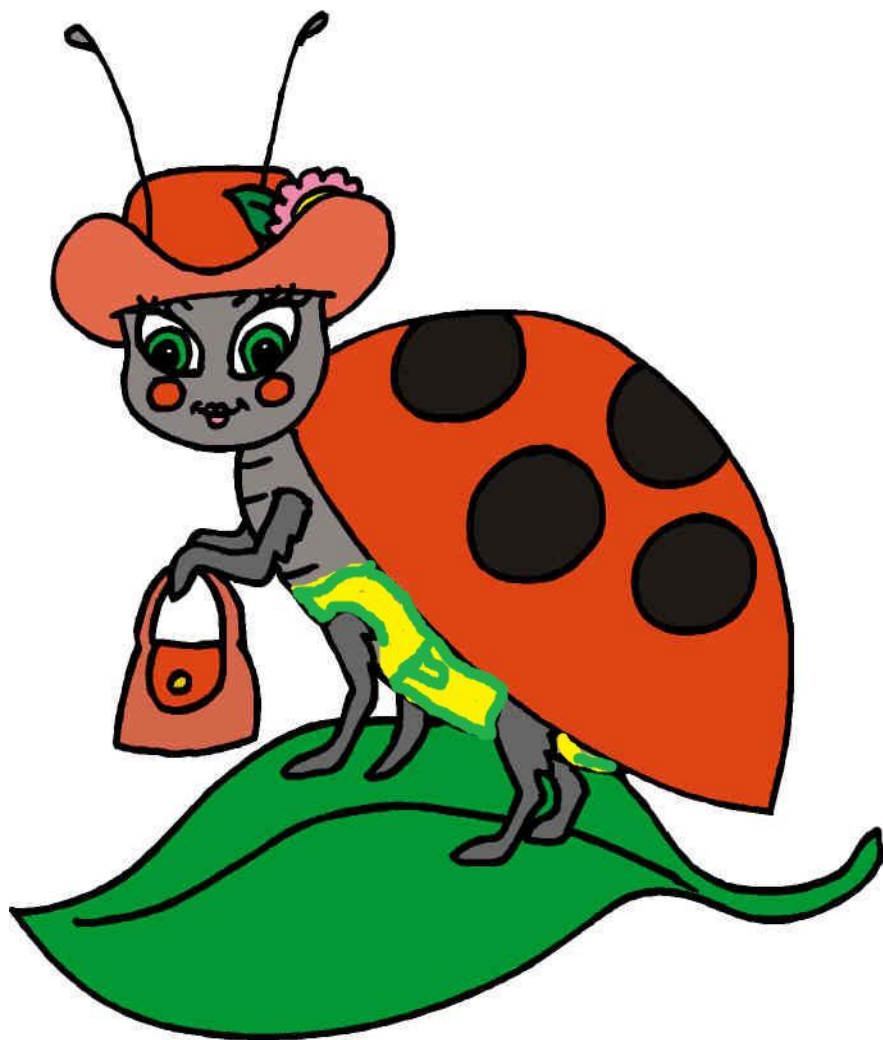

**Платья настоящие,
Яркие, блестящие.
Как сошьют в гамак сажают,
Пауки их в нём качают.**

**Мухи, мухи, мухи, мухи
В гамаках качаются,
Нежно улыбаются.
Паучихам шепчут в ушки:**

**«Платье наше будет лучшим?
Наш узор неповторим?
Шейте, шейте! Гуще, гуще!
Много денежек дадим!»**

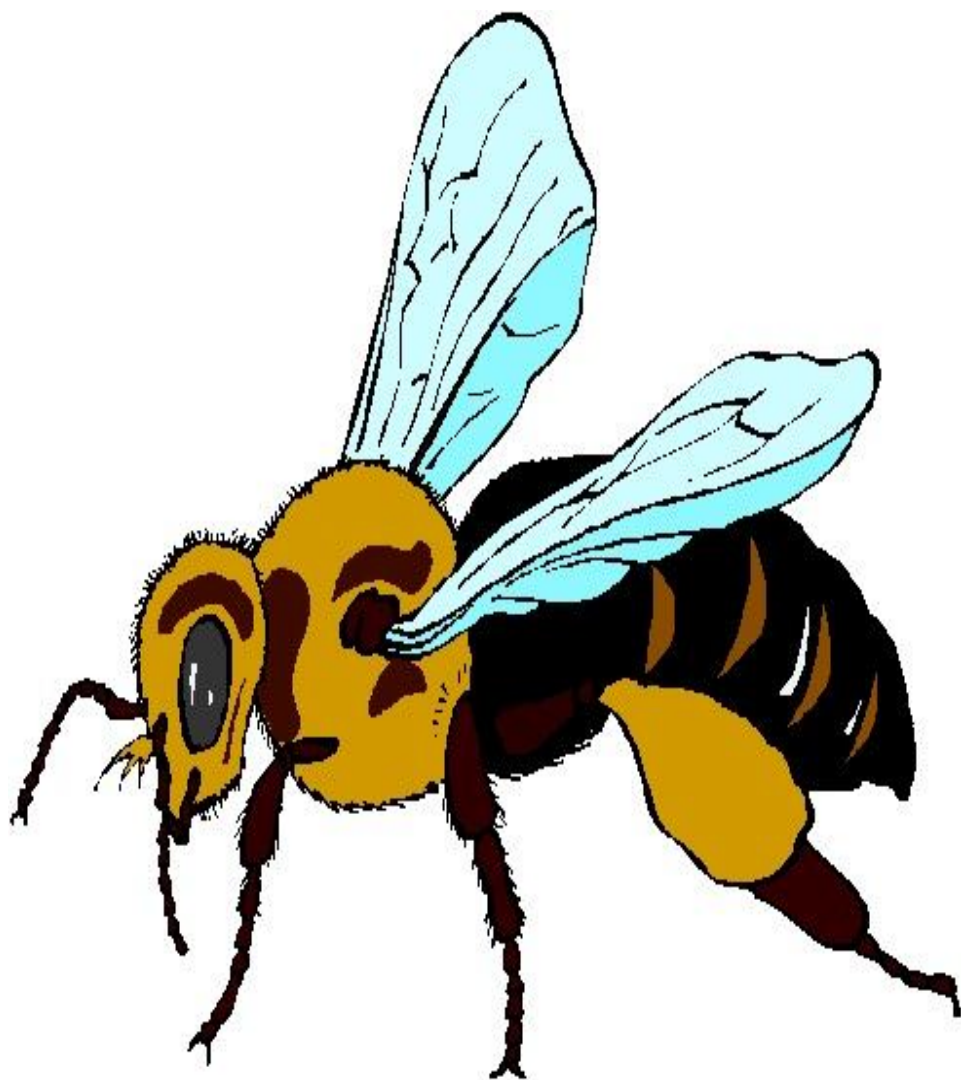

А жуки, жуки, жуки,
В новых шортиках ползли.
Расползались быстро,
Их дома не близко.

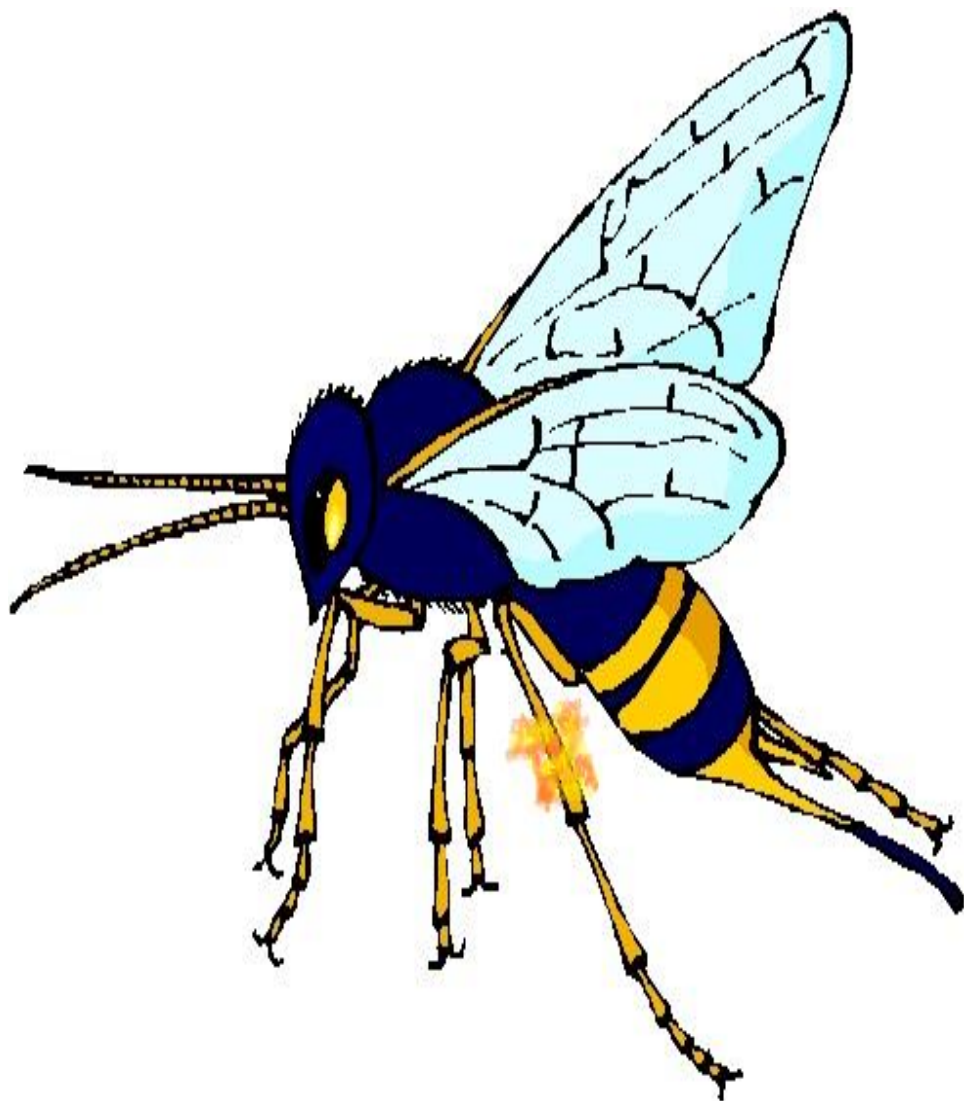

рис.Олеси

**Паучихам денежку,
Тараканам семечку,
Отдавали за труды!
Шорты новые круты!**

**Ну, а мухи! Ну, а мухи!
Щеголяли будто в пухе.
В платьях тёплых шерстяных
Или в трусиках одних.**

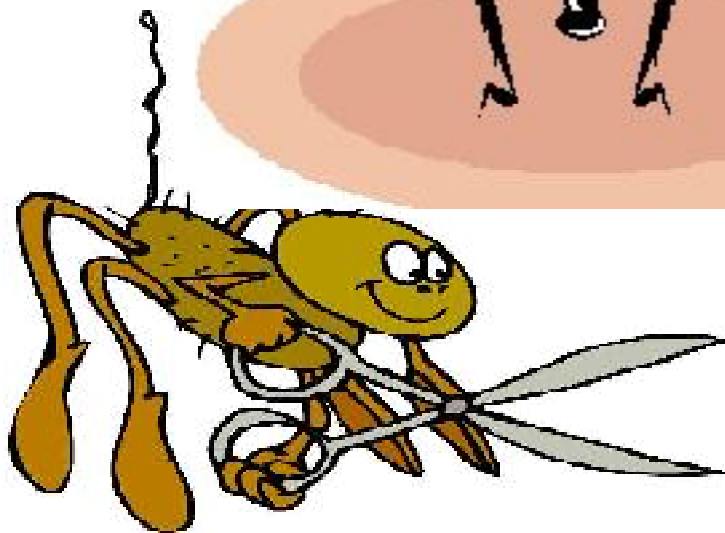

Ох, жужжали! Обсуждали!
И красавиц выбирали.
Одевали им корону,
Но на лапку по закону.

**Так летать всегда сподручней,
Мухам шумной, чёрной тучей.
Чтобы крошки приносить,
Тараканчикам платить.**

Паукам и паучихам
Приносили деньги тихо.
По одной к ним заходили,
Чтобы платья лучше шили.

the 1980s. The 1980s have been a decade of change for the world of work. The changes have been dramatic and have affected the lives of millions of people. The changes have been brought about by a combination of factors, including technological advances, demographic changes, and a shift in the way that businesses operate.

One of the most significant changes has been the rise of the service economy. In the past, most people worked in manufacturing or agriculture. However, in the 1980s, more and more people have moved into service jobs. This has led to a change in the way that people work, with many people now working in offices or in customer service roles.

Another major change has been the increasing use of technology in the workplace. This has led to the development of new jobs and the automation of many tasks. While this has led to increased productivity, it has also led to the displacement of many workers. This has been a source of concern for many people, particularly those who are not skilled in the use of technology.

Demographic changes have also played a role in the changes in the world of work. The population of many countries has increased, and there has been a shift in the age structure of the workforce. This has led to a need for more workers, particularly in the service sector. It has also led to a greater emphasis on education and training for workers.

Finally, there has been a shift in the way that businesses operate. Many businesses have become more competitive, and they have had to find ways to reduce costs and increase efficiency. This has led to a focus on productivity and a reduction in the number of workers. This has been a source of concern for many people, particularly those who are not skilled in the use of technology.

In conclusion, the 1980s have been a decade of change for the world of work. The changes have been dramatic and have affected the lives of millions of people. The changes have been brought about by a combination of factors, including technological advances, demographic changes, and a shift in the way that businesses operate. While these changes have led to increased productivity and the development of new jobs, they have also led to the displacement of many workers and a greater emphasis on education and training.

As we move into the 1990s, it is clear that the world of work will continue to change. The changes will be brought about by a combination of factors, including technological advances, demographic changes, and a shift in the way that businesses operate. It is important that we be prepared for these changes and that we take steps to ensure that we are able to adapt to them.

One of the most important steps that we can take is to invest in education and training. This will help us to develop the skills that we need to succeed in the new world of work. It will also help us to stay up-to-date on the latest technological advances. This is a key to success in the 1990s and beyond.

In addition, it is important that we be flexible and adaptable. The world of work is constantly changing, and we must be able to adapt to these changes. This means being open to new ideas and being willing to learn from our mistakes. It also means being able to work in a variety of different environments and with a variety of different people.

Finally, it is important that we be proactive. We should not wait for changes to happen to us; we should take steps to anticipate them and to prepare for them. This means staying informed about the latest trends in the world of work and taking steps to develop the skills that we need to succeed. It also means being proactive in our own careers, seeking out new opportunities and taking steps to advance our own professional development.
